

Capabilities Statement

NanoTech is a dynamic blend of Vision-Centric Approach, Hybrid Expertise and relationship-driven excellence. A nimble and forward-thinking small business with almost two decades of experience specializes in professional and technical services for Government and Commercial clients. Our professional services portfolio includes Cyber Security, IT Services, Staff Augmentation and Digital Training and Certification.

We know our clients work with us because they trust our people, work commitment and our relationship. NanoTech’s customer retention rate is 98% for the past decade.

Enduring Relationships: While the private sector thrives on rapid evolution, our commitment to clients transcends trends. NanoTech fosters long-lasting partnerships, built on trust and reliability. Whether it’s a mission in the Area of Responsibility (AOR) or Downton, our dedication remains constant.

Hybrid Expertise: NanoTech seamlessly blends private sector experience with relationship-driven support. Our unique fusion allows us to deliver optimal results to the USG. From cutting-edge technologies to time-tested practices, we bridge the gap between technicians and humans.

Vision-Centric Approach: We focus on understanding our client’s long term vision from day one and align our solutions to drive sustained success.

In addition to our comprehensive capabilities, NanoTech has/or is working with Private industry leaders to build their back-end environment (Amazon’s HQ2 and EXXON/Mobile), Digital Training and development (Alexandria City Sheriff’s Office—Detention Center), IT support and automation (non-profits and YANKEE WHITE residential accounts).

NanoTech’s cornerstone lies in building robust relationship foundations and our flexibility ensures that we remain agile in a dynamic landscape.
